Thoracoscopy

Describe a video-assisted thoracoscopy.	The patient is typically placed in the lateral position. The video thoracoscope is inserted into a small incision so that the pleural cavity can be assessed. Several other small incisions are then made for the insertion of instruments. The instruments and the thoracoscope can be interchanged based upon the location of the problem. *Jaffe RA, Schmiesing CA, Golianu B. Anesthesiologist's Manual of Surgical Procedures. 5th ed. What are the common preop diagnoses seen in patients presenting for Video-Assisted Thoracoscopic Surgery (VATS)?	Recurrent empyema, recurrent pneumothorax, pleural effusions, localized lung masses, pulmonary infiltrates, achalasia, hyperhidrosis, reflex sympathetic dystrophy (RSD) *Jaffe RA, Schmiesing CA, Golianu B. Anesthesiologist's Manual of Surgical Procedures. 5th ed. Philadelphia, PA: Wolters Kluwer Health, 2014: 326.*
List ways in which VATS are used.	VATS are used to treat spontaneous pneumothorax caused by apical blebs, talc pleurodesis, peripheral infiltrate or nodule biopsies, drainage of pleural effusions or other collections of fluid, evaluation and evacuation of traumatic hemothorax, early empyema decortication, standard lung resections, lung-volume reduction surgery, and for the removal of some small tumors and cysts. They can also be used for nonthoracic procedures such as minimally invasive cardiac surgery, pericardial window, and sympathectomy. *Jaffe RA, Schmiesing CA, Golianu B. Anesthesiologist's Manual of Surgical Procedures. 5th ed. Philadelphia, PA: Wolters Kluwer Health, 2014: 326.*
Is the use of a double lumen tube necessary with a VATS? Why or why not?	Yes. A double lumen tube must be used so that the ipsilateral lung is collapsed and proper visualization of the pleural cavity is achieved. *Jaffe RA, Schmiesing CA, Golianu B. Anesthesiologist's Manual of Surgical Procedures. 5th ed. Philadelphia, PA: Wolters Kluwer Health, 2014: 326.*
What are potential complications of a VATS.	Hemorrhage, air embolism, air leak from lung, damage to intrathoracic structures *Jaffe RA, Schmiesing CA, Golianu B. Anesthesiologist's Manual of Surgical Procedures. 5th ed. Philadelphia, PA: Wolters Kluwer Health, 2014: 326.*
